

MODULAR UNITS

Woodmont Academy Pictured at the original location in Woodstock, Maryland

This stand-alone building by Williams Scotsman and Markline Industries features classrooms, restrooms, a library, and offices all under one roof. It took 122 days to complete the 7,200 sq. ft. building. When originally leased, school officials planned to move in two to three years when going to a new location. The building has a low-maintenance exterior and vinyl gypsum interior walls. This building was relocated in 2003 to Cooksville, Maryland.
